DECORATIVE PANEL (TAFILAM) WITH TAFIPAN
SAFETY DATA SHEET

Section 1. Chemical product and company identifications

Product identifier: TafiLam
Other means of identification: EPA TCSA Title VI particle paneling, laminated plastic impregnated with amino resins papers. Melamine board, particle board laminated decorative panel.
CAS: N/A
Recommended uses: Furniture, finishing and decorative coating.

Supplier / Manufacturer: In case of emergency:
Tafisa Canada (819) 583-3014 (ext 333) - Security 24hrs
4660, Villeneuve (819) 583 2930 – front desk 8AM to 5PM
Quebec, Canada G6B 2C3 Or call your local Emergency Health Services Center.
Phone: (819) 583-2930

Section 2. Hazards identifications

As a solid piece risks do not apply. Risks apply to dust vapours and fumes generated upon transformation and cutting.

Oxidizing solids, category 3
Skin corrosion/irritation, category 2
Eye damage/Irritation, category 2A
Skin sensitization, category 1

Hazard statement: Warning

GHS hazard statement
H272: May intensify fire; oxidizer
H315: Causes skin irritation
H317: May cause an allergic skin reaction
H319: Causes serious eye irritation

GHS Precautionary statements
P210: Keep away from heat/sparks/open flames/hot surfaces – No smoking
P220: Keep/Store away from clothing/…/combustible materials
P261: Avoid breathing dust/fume/gas/mist/vapours/spray
P264: Wash hands thoroughly after handling
P272: Contaminated work clothing should not be allowed out of the workplace
P280: Wear protective gloves/protective clothing/eye protection/face protection
P302+P352: IF ON SKIN: Wash with plenty of water
P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing
P333+P313: If skin irritation or rash occurs: Get medical advice/attention
P337+P313: If eye irritation persists: Get medical attention
P362+P364: Take off contaminated clothing and wash it before reuse
P370+P378: In case of fire: Use dry chemical or alcohol-resistant foam to extinguish
P501: Dispose of contents/container to authorised waste facility according to regional regulations

Section 3. Composition and information on ingredients

<table>
<thead>
<tr>

<tr>
<td>Ammonium nitrate</td>
<td>6484-52-2</td>
<td>0.1 - 15</td>
</tr>
</tbody>
</table>

Note: This product contains traces of MDI in quantities inferior to control parameters.
Section 4. First aid measures

In solid form, first aid measures are most unlikely. In case of fine particles and dust from secondary transformation exposure, apply the following:

**Eye contact:** Immediately flush eyes with plenty of water. Check for contact lenses; carefully remove them if you can. Get medical attention immediately.

**Skin contact:** Rinse skin with plenty of water and wash exposed areas with soft soap and water. Get medical attention immediately if irritation symptoms appear.

**Inhalation:** In the event of fine particle inhalation, move the victim out of the contaminated area and to fresh air. If the victim ceased breathing, provide artificial respiration. Do not use mouth-to-mouth techniques if victims face, mouth and airways are contaminated with the substance. Induce artificial respiration with a pocket mask equipped with a one-way valve or other proper respiratory medical devices. Get medical attention immediately.

**Ingestion:** Unlikely however, in case of ingestion, DO NOT induce vomiting without advice from a local poison or medical center. Get medical attention immediately if irritation symptoms appear.

**Notice to Physician:** Provide treatments according to symptoms. In case of inhalation symptoms, monitor for chemical pneumosis and respiratory complications.

Section 5. Fire fighting measures

**Suitable extinguishing media**
Firefighting method adapted to products immediate surroundings such as water, dry chemical powder, Carbon Dioxide (CO₂), sand etc.

**Specific hazard arising from the chemical**
Product base is wood fibres. Product is combustible. It will burn if involved in a fire. Wood dusts may form an explosive mix with air in the right circumstances and concentrations.

**Special protective actions for fire-fighters**
Use water or carbonated gasses to fight fire. Class A foam may reduce fire possibilities by easing water penetration. Wear respiratory protection apparatus with formaldehyde and organic vapour approved cartridges.

Section 6. Accidental release measures

Product poses no accidental spill hazards.

**Personal precautions:** Not applicable

**Environmental precautions:** Not applicable

**Methods for cleaning up:** Not applicable

Section 7. Handling and storage

**Handling:** Handle according to task performed with product. Apply professional and personal hygiene practices such as washing hands before eating. Ban eating, drinking and smoking in contaminated areas. Use workplace safety procedures in order to prevent accidents.

**Storage:** It is recommended to store product in an area where humidity is reasonable and where temperature corresponds to the room temperature where the product will be used.

Section 8. Exposure Controls, Personal Protections

**Control parameters:**

**Wood dust / Cellulose fibre:**
OSHA PEL: TWA, 15.0 mg/m³ (Total dust) and 5.0 mg/m³ (respirable)
ACGIH TLV: TWA, 1.0 mg/m³ (some hardwoods)
ACGIH TLV: TWA, 5.0 mg/m³ (Softwoods)
ACGIH TLV: STEL, 10.0 mg/m³ (Softwoods)
NIOSH REL: TWA, 1.0 mg/m³
Ontario (2005): TWA, Softwoods 1.0 mg/m³ (total dust) Hardwoods 5.0 mg/m³
British-Columbia reg. 296-297 (1997): 1.0 mg/m³ K1
Québec RQMT (2005): TWA, 5.0 mg/m³ (total dust)

**Formaldehyde (CAS 50-00-0):**
OSHA PEL: TWA, 0.75 ppm
OSHA PEL: STEL, 2.0 ppm
ACGIH TLV: Ceiling at 0.3 ppm
Ontario reg.833 (2005) OEL: 1.0 ppm
British-Columbia reg. 296-297 (1997): TWA, 0.3 ppm
Québec RQMT (2001) – Ceiling value (PEL): 2.0 ppm C2

Eyes: Safety glasses with side shields, to avoid eye contact.
Respiratory: In normal handling, respiratory protection is not necessary. In case of dust emanation, wear a dust mask or cartridge mask for fine particles.
Hands: Work gloves in order to prevent cuts, splinters and abrasions.
Skin/body: Wear fitted work clothing to prevent skin contamination.
Other: The type of protection should be based on the task. Provide an emergency eyewash. For more information on exposure controls and personal protections, see your Occupational Hygiene Supervisor or Occupational Health and safety officer.

Section 9. Physical and chemical properties

Physical status: Solid
Color: Variable color depending on printed paper.
Odour: Varies according to type of wood and indirectly proportionate to age of panel.
Odour threshold: Not applicable
Melting point/Freezing point: Not applicable
Boiling point: Not applicable
Flammability: Product may intensify fire, oxidizer
Lower and upper explosion limits: Lower: Class A - combustible material, 40 grams per m³ of air (Wood dusts). Class C - ASTM E84 (Panels).
Flash point: Not available
Auto-ignition temperature: Data not available
Decomposition temperature: Data not available
pH: Not applicable
Kinematic viscosity: Data not available
Solubility: Insoluble
Partition in coefficient n-octanol/water: Data not available
Vapour pressure: Data not available
Density: Varies according to type of wood and humidity degree.
Relative vapour density: Data not available
Particle characteristics: Data not available

Section 10. Stability and reactivity

Reactivity: Stable. Temperature may increase the amount of Formaldehyde emissions emitted from the panels particles.
Chemical stability: Stable under normal conditions
Possibility of hazardous reactions: Thermal decomposition products, such as Carbon Dioxide (CO₂), Carbon Monoxide (CO), Ammonia (NH₃), Aliphatic Aldehydes, Rosin acids, Terpenes, Polycyclic aromatic hydrocarbons and Organic acids.
Conditions to avoid: High temperatures, high humidity, low air exchange. In case of wood dusts, avoid contacts with oxidizing agents and drying oils. Avoid open flames. Product may burn in temperatures exceeding 200ºC. Dusts may form an explosive mix with air in the right circumstances and concentrations.
Incompatible materials: Oxidizing agents, open flames and elevated temperatures. Excessive humidity and contact with water may deform product.
Hazardous decomposition products: Will not occur.

Section 11. Toxicological information

In solid form, toxicological effects are unlikely. In case of fine particles and dust from secondary transformation exposure, the following applies:

<table>
<thead>
<tr>
<th>Name</th>
<th>CAS#</th>
<th>LD₅₀</th>
<th>LC₅₀</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ammonium nitrate</td>
<td>6484-52-2</td>
<td>Rat (Oral): 2217 mg/kg</td>
<td>Rat: (Inh) 88.8 mg/l</td>
</tr>
<tr>
<td>Formaldehyde</td>
<td>50-00-0</td>
<td>Rabbit (Cutaneous): 270 mg/kg</td>
<td>Rat (Inh): 100 mg/kg</td>
</tr>
</tbody>
</table>

Skin corrosion/irritation
No data available
Serious eye damage/irritation
No data available

Respiratory or skin sensitisation
Formaldehyde: May cause allergic reactions on skin or skin sensitization.

Gem cell mutagenicity
No data available

Carcinogenicity
Not classified as carcinogenic, however wood dust generated upon cutting has been linked to nasal and respiratory cancers.

Reproductive toxicity
No data available

STOT- Single exposure
Ammonium Nitrate: Inhalation: May cause respiratory tract irritation

STOT- repeated exposure
No data available

Aspiration hazard
No data available

Information on likely route of exposure:
Inhalation, ingestion, skin and eye.

Section 12. Ecological information

Ecological data for aquatic environments:

<table>
<thead>
<tr>
<th>Name</th>
<th>Results</th>
<th>Species</th>
<th>Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>Formaldehyde (50-00-0)</td>
<td>LC$_{50}$: 24.1 mg/l</td>

<td>96 hrs</td>
</tr>
<tr>
<td></td>
<td>LC$_{90}$: 0.10 mg/l</td>
<td>Bluegill</td>
<td>96 hrs</td>
</tr>
<tr>
<td></td>
<td>EC$_{50}$: 9.0 mg/l</td>
<td>Photobacterium phosphoreum</td>
<td>5 min</td>
</tr>
<tr>
<td></td>
<td>EC$_{50}$: 6.81 mg/l</td>
<td>Photobacterium phosphoreum</td>
<td>15 min</td>
</tr>
<tr>
<td></td>
<td>EC$_{50}$: 20 mg/l</td>
<td>Water flea</td>
<td>96 hrs</td>
</tr>
<tr>
<td>Ammonium Nitrate (6484-52-2)</td>
<td>LC$_{50}$: 74 mg/l</td>
<td>Cyprinus carpio</td>
<td>N/A</td>
</tr>
</tbody>
</table>

Persistence and degradability
No data available

Bioaccumulative potential
No data available

Mobility in soil
No data available

PBT and vPvB assessment
No data available

Other adverse effects
Formaldehyde: Toxic for aquatic organisms.

Section 13. Disposal considerations

Waste disposal: Dispose of waste in conformity with the federal, provincial and local laws. Product is recyclable.

Section 14. Transportation information

Classification DOT/ IMDG/IATA label: Not regulated
Section 15. Regulatory information

CANADA:
WHMIS (Canada):

Not controlled

UNITED STATES:
NFPA classification:

Legend: 4: Severe, 3: High, 2: Moderate, 1: Slightly, 0: Not hazardous

United States regulations:

California proposition 65 requirements:
Warning: Piercing, sawing, sanding or shaping wood products creates wood dusts, a substance recognized for causing cancer according to the state of California. Avoid inhaling wood dusts or use a dust mask or other personal protection measures.

Occupational Safety and Health Administration:
Wood products are not considered dangerous merchandise according to mentioned criteria in the Hazard Communication Standard of OSHA 29 CFR 1910.1200. However, formaldehyde emissions and wood dusts produced by sawing, sanding or shaping of the panels may be hazardous. This product contains formaldehyde.

Department of Housing and Urban Development:
The 24 CFR 3280 regulations by the United-States Department of Housing and Urban Development HUD define the emission standards and emits a certification emitted by a third party pour particle panels and Formaldehyde emissions emitted from MDF panels.

Component analysis:

Formaldehyde (50-00-0)
SARA Section 302 (40 CFR 355 Annex A): Listed
SARA Section 313 (40 CFR 372.65) and CERCLA (40 CFR 302.4): Listed
SARA 302: 500 lbs TPQ
CERCLA: 100 lbs final RQ; 45.4 kg final RQ.

REACH Classification (US):

ESIS - European chemical Substances Information System: Not regulated
REACH - Registration, Evaluation, Authorisation and Restriction of Chemical substances: Not regulated

List of Registered Phase-in Substances:

<table>
<thead>
<tr>
<th>EC No.</th>
<th>CAS RN</th>
<th>Substance Name</th>
<th>Registered As:</th>
<th>Full</th>
<th>OSII</th>
<th>TII</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Not regulated</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Full: Indicates registration under REACH Article 10 as a full dossier.
OSII: Indicates registration under REACH Article 17 as an on-site isolated intermediate (OSII).
TII: Indicates registration under REACH Article 18 as a transported isolated intermediate (TII).
'Yes': Indicates the substance registration under REACH is complete.
'In Process': Indicates a dossier on the substance has been successfully submitted to ECHA and is being processed, i.e. the completeness check is pending (and could potentially be unsuccessful).
